

SPELMAN DRAW

These results were based on having 52 quads in the draw.

After draw times are posted, groups may drop out of the draw or simply do not choose a room at their draw time. Hence, it is possible for groups not among the top times to draw Spelman rooms.

Group rating formula can be found in the how your application is weighted section of the Room Draw Guide.

Spelman doubles are used for married housing and are not available in the Spelman Draw.
